ENV463H1 Edible Campus
This course situates students and campuses within the context of broader movements for more ecologically rational and socially-just food systems. Topics include critical food systems pedagogy; the political economy of campus food systems; student food (in)security and health; campus food systems alternatives; campus food growing spaces; student/campus-based food movements; campus-community partnerships. The course is praxis-driven and will provide students with opportunities to engage in change-making on their campus, and beyond, through an action-focused project with a campus and/or community partner.

Prerequisites: ENV221H1/ENV222H1, completion of 10 credits

Breadth: BR=3
