School of the Environment: Collaborative Specialization in Environmental Studies (CSES)

Below you will find the requirements for students in the Political Science MA and PhD who are completing a collaborative specialization in Environmental Studies. Although this document can provide you with guidance for completing the specialization, note that the School of Graduate Studies Calendar is the authoritative source for degree requirements.

Master of Arts (MA)

Religion MA students complete a total of 4.0 FCEs. Those enrolled in the Collaborative Specialization in Environmental Studies complete the following requirements:

- 2.5 FCE core courses including:
  - RLG2000Y which counts towards the CSES research paper requirement provided there is an environment related component. A copy of the final research paper must be submitted to the School of the Environment prior to convocation.
- 1.5 Elective coursework, which must include the following Environmental Studies collaborative specialization requirements:
  - Environmental Decision Making (0.5 FCE)
  - One elective (0.5 FCE) from the CSES course list.
  - ENV4444Y Internship

Doctor of Philosophy (PhD)

Religion PhD students with a previous master’s degree complete 4.0 FCEs. Those enrolled in the Collaborative Specialization in Environmental Studies complete the following requirements:

- 2.5 FCE core courses
- 1.5 Elective coursework, which must include the following Environmental Studies collaborative specialization requirements:
  - ENV1001H: Environmental Decision Making (0.5 FCE)
  - One elective (0.5 FCE) from the CSES course list.

In addition, students complete a thesis on an environmental theme. It is recommended that the thesis committee membership will include a supervisor (from the student’s home department who is a member of the CSES core faculty) and at least one other member from a collaborating department. A digital copy of the final thesis must be submitted to the School of the Environment prior to convocation.

All PhD students are required to give an oral presentation of their doctoral research as part of the School’s Environment Seminar Series or Research Day, which is held once per year. For the latter, the oral presentation may or may not be done in conjunction with a summary poster, depending on the decided format of the School’s Research Day in any given year.
