APPENDIX 1

Concerning the requirements for Master’s and Doctoral degree students registered in the Program in Planning (Department of Geography) and in the Environment and Health Collaborative Program at the School of the Environment.

**Master’s degree (M.Sc. Pl.) in Planning (total of 8.0 FCE)**

Offered jointly with the School of the Environment and Planning Program (Department of Geography). Students who wish to qualify for notation of Collaborative Environment and Health Program completion are required to complete:

- 16 half-courses or their equivalent. These courses must include the core courses in Planning (PLA 1101H, PLA 1102H, PLA 1103H, PLA 1105H, PLA 1106H and PLA 1107Y),
- the Environment & Health half-credit (0.5 FCE) core course ENV 4001H "Graduate Seminars in Environment and Health", and
- one half-credit (0.5 FCE) course elective from the approved list of courses at the School of the Environment.

Students must fulfill the requirements for one of the specializations in planning; write, under the supervision of a member of the Geography/Planning faculty, a current issues paper on and environment and health related topic (to partially satisfy the requirements of PLA 1107Y), typically of about 35 pages, which must be presented and defended in an oral examination before a committee of faculty members and a planning client; and take part in an internship which provides “on the job” experience in environmental analysis and planning.

A copy of the final research paper must be submitted to the School of the Environment prior to convocation.

The Collaborative Program requirements may be counted as electives towards master’s degree program requirements.

**Doctoral degree (Ph.D.) in Planning (total of 3.0 FCE)**

Doctoral degree students who wish to qualify for notation of Collaborative Environment and Health Program completion must complete a total of 3.0 FCE, including:

- 1.5 FCE of core courses in Planning (PLA 2000H, PLA 2001H and JPG 1111H or another approved methods course),
- the Environment & Health half-credit (0.5 FCE) core course ENV 4001H "Graduate Seminars in Environment and Health", unless already taken at the master’s level, and
- one half-credit (0.5 FCE) course elective from the approved list of courses at the School of the Environment,
- and one additional half-credit (0.5 FCE) course elective in any subject.
April 2, 2013

- Doctoral degree students are also required to present a seminar in either of the two Seminar Series run by the School of the Environment (the Environment Series or the Environment and Health Series), or deliver a brief talk at the School’s Research Day,
- and write a thesis in the home department on an environment and health related topic.

A copy of the final thesis must be submitted to the School of the Environment prior to convocation.

The Collaborative Program requirements may be counted as electives towards doctoral degree program requirements.
