APPENDIX 1

Concerning the requirements for Master’s and Doctoral degree students registered in the Dalla Lana Scholl of Public Health and in the Environment and Health Collaborative Program at the School of the Environment.

*Master of Public Health (M.P.H) Requirements: (total of 10.0 FCE)*

Students who wish to qualify for notation of Collaborative Environment and Health Program completion at the M.P.H. level must complete a total of 10.0 full-course equivalents (FCEs), of which 0.5 FCE is a core public health sciences subject and at least 1.0 FCE is a field practicum. Specific program requirements and options vary by area of specialization and are fully explained on the DLSPH website. The 10.0 FCEs must include the 1.0 FCE that students are required to take towards completing the Environment and Health collaborative program requirements, *i.e.* the half-credit (0.5 FCE) core course ENV 4001H, plus one half-credit (0.5 FCE) course elective from the approved list of courses at School of the Environment.

*Master of Science in Community Health (M.Sc.CH) Requirements: (total of 5.0 FCE)*

Students who wish qualify for notation of Collaborative Environment and Health Program completion at the M.Sc.CH level must complete a total of 5.0 full-course equivalents (FCEs), including 3.5 FCEs required courses from the respective M.Sc.CH option and 1.5 FCEs elective courses. Specific program requirements and options vary by area of specialization and are fully explained on the DLSPH website. The 5.0 FCEs must include the 1.0 FCE that students are required to take towards completing the Environment and Health collaborative program requirements, *i.e.* the half-credit (0.5 FCE) core course ENV 4001H, plus one half-credit (0.5 FCE) course elective from the approved list of courses at School of the Environment.

In those master’s degree options that require a thesis or research paper, the research will include an environment and health related component acceptable to the Program Committee in Environment and Health. Each thesis committee will require a supervisor from the student’s home department and at least one other member from another graduate unit, both of whom are also members of graduate faculty in the School of the Environment. A copy of the final thesis/research paper must be submitted to the School of the Environment prior to convocation.

The Collaborative Program requirements may be counted as electives towards master’s degree program requirements.
April 2, 2013

**Doctoral degree (Ph.D.) in Public Health (total of 3.5 - 4.0 FCE)**

Students who wish to qualify for notation of Collaborative Environment and Health Program completion in the Ph.D. must complete a total of 3.5 - 4.0 full-course equivalents (FCEs) as follows:

- 2.5 – 3.0 FCEs from the list of required courses in Public Health. Course requirements vary by specialization and are related to the student’s knowledge of the field. They are fully outlined on the DLSPH website.
- 1.0 FCEs in the Environment and Health Collaborative Program at the School of the Environment, including the half-credit (0.5 FCE) core course ENV 4001H, unless already taken at the master’s level, plus one half-credit (0.5 FCE) course elective from the approved list of courses at School of the Environment.
- Write a thesis in the home department on an environment and health topic, and present a seminar in either of the two Seminar Series run by the School of the Environment (the Environment Series or the Environment and Health Series), or deliver a brief talk at the School's Research Day.

  Each thesis committee will require a supervisor from the student’s home department and at least one other member from another graduate unit, both of whom are also members of graduate faculty in the School of the Environment.

  A copy of the final thesis must be submitted to the School of the Environment prior to convocation.

The Collaborative Program requirements may be counted as electives towards doctoral degree program requirements.
